## Blackbox Accuracy

The graph displays the percentage of people who have ever been in a romantic relationship across four age groups from 1990 to 2010. The 18-24 age group consistently has the highest percentage, starting at approximately 85% in 1990 and rising to about 90% by 2010. The 25-34 age group follows, starting at about 75% and reaching 80%. The 35-44 age group starts at 65% and reaches 70%, while the 45-54 age group starts at 55% and reaches 60%. All age groups show a steady increase over the 20-year period.
